Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The Response filed on October 7, 2005, has been entered and acknowledged by the Examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 34 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,700,326 to Devir.

Regarding to claim 34, Devir discloses in Figures 1 and 2, a cylindrical hollow cathode (12) having a first end and a second end, wherein the second end of the cylindrical hollow cathode (12) is closed, and wherein an inner surface of the cylindrical hollow cathode (12) is partially covered by a layer of getter material (14).

Response to Arguments

4. Applicant's arguments with respect to claim 34 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

5. Claims 1-7, 15, 17-23 and 29-33 are allowed.
6. The following is an examiner's statement of reasons for allowance:

Regarding to independent claim 1, prior art of record taken alone or in combination fails to teach or suggest a cathode formed by a cylindrical hollow part closed at first end and open at a second end, wherein an outer and inner surface portion of the cylindrical hollow part includes a layer of getter material.

Regarding to independent claim 17, prior art of record taken alone or in combination fails to teach or suggest a cathode, formed by a cylindrical hollow part closed at first end and open at a second end, wherein on an outer or inner portion of the surface of the cylindrical hollow part is present a layer of a getter material, and wherein a portion of the surface near the first end of the cathode is free of the layer of getter material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
